

Ortega, Ivan

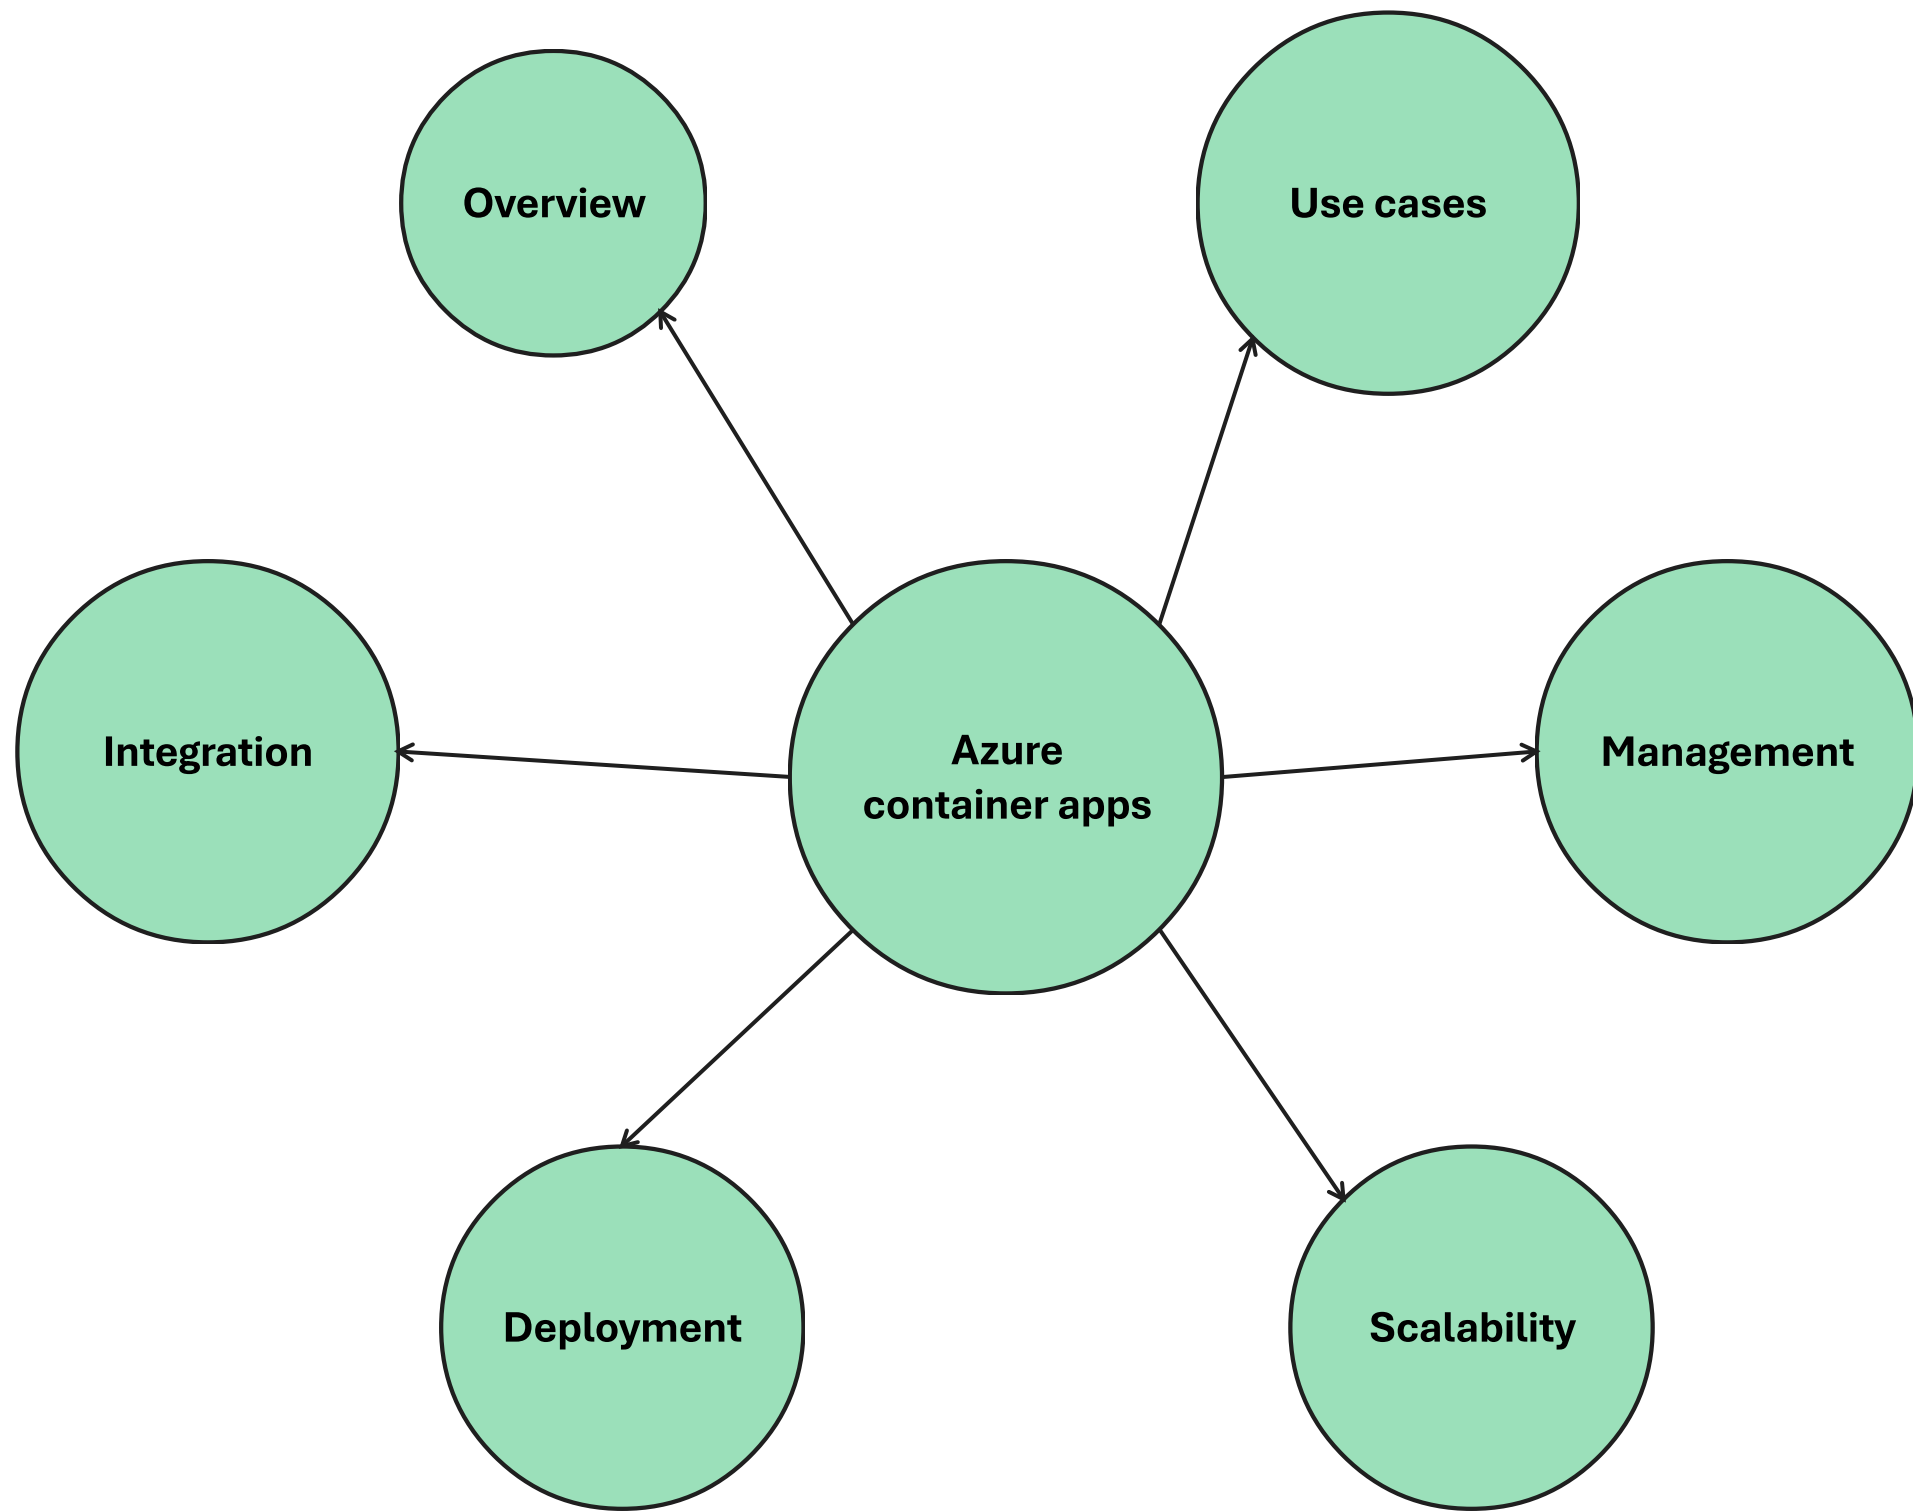

ACA is a serverless container platform that simplifies the deployment and management of microservices-based applications by abstracting away the underlying infrastructure

Ortega, Ivan

ACA is designed for microservices and serverless applications that benefit from rapid scaling and simplified management.

Ortega, Ivan

ACA integrates with Azure Logic Apps, Functions, and Event Grid for event-driven architectures.

Ortega, Ivan

ACA builds upon AKS and offers a simplified PaaS experience for running containers, with additional features like Dapr for microservices.

Ortega, Ivan

ACA provides a PaaS experience with quick deployment and management capabilities.

Ortega, Ivan

ACA supports both HTTP-based autoscaling and event-driven scaling, making it ideal for applications that need to respond quickly to changes in demand.
