

Ortega, Ivan

For four kind of  
storage resources:

Blob containers  
File shares  
Queues  
Tables

**Stored  
access  
policy**

```
graph LR; A((Stored access policy)) --> B[For four kind of storage resources: Blob containers, File shares, Queues, Tables]; A --> C[Highlighted the inflexibility of creating a SAS for each image, each with its own expiration and access controls]
```

Ortega, Ivan

Highlighted the  
inflexibility of creating  
a SAS for each image,  
each with its own  
expiration and access  
controls
