Ortega, Ivan Highly available network file shares Ortega, Ivan Multiple virtual machines can share the same files with both read and write access

Ortega, Ivan

Azure

files

Useful when developing applications and you want all dev computers to have the same tools installed

Ortega, Ivan

Server Message Block (SMB) protocol and the Network File System (NFS) protocol

Ortega, Ivan

True directory objects

Ortega, Ivan

Ideal to lift and shift an application to the cloud that already uses the native file system APIs
