Ortega, Ivan

Conduct real-time remediation

Perform remediation

Ortega, Ivan

Enable built-in policies or build custom policies for all resource types

Enforce rules and compliance

Policy advanta ges

Excercise governance

Ortega, Ivan

- Support multiple engineering teams (deploying to and operating in the environment)
- Manage multiple subscriptions
- Standardize and enforce how cloud resources are configured
- Manage regulatory compliance, cost control, security, and design consistency

Apply policies at scate

Ortega, Ivan

Apply policies to a management group with control across your entire organization.

Ortega, Ivan

Azure RBAC authorization for management group operations **isn't enabled by default.**

Ortega, Ivan

A management group three can support up to **six levels of depth**

Ortega, Ivan

Level of scope and control above your suscriptions

Ortega, Ivan

Efficent way to **manage access, policies and compliance** of multiple subscriptions

Management groups

Ortega, Ivan

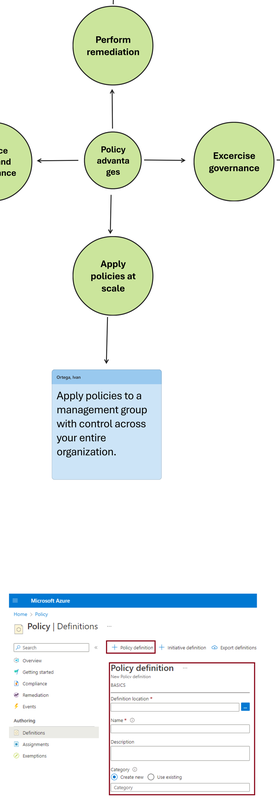
Management as containers to **manage access policy and compliance across your subscriptions**.

Ortega, Ivan

New subscriptions are placed under the **top-level management group, (root group)**.

Ortega, Ivan

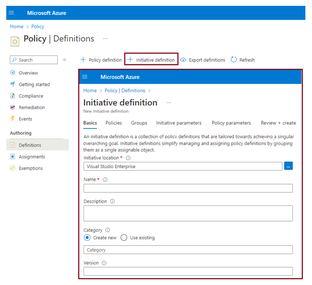
All subscriptions within a management group **automatically inherit the conditions applied** to the management group



Ortega, Ivan

A policy definition expresses a **condition to evaluate and the actions to perform** when the condition is met.

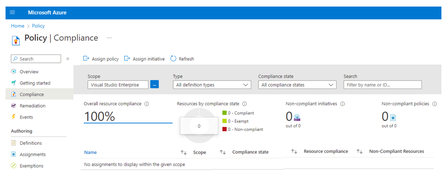
Create policy definition



Step 1

Ortega, Ivan

Audit machines with insecure password security settings



Ortega, Ivan

Evaluate the state of compliance for all your resources. Individual resources, resource groups, and subscriptions within a scope can be exempted from having the policy rules affect it.
Exclusions are handled individually for each assignment.

Determine compliance

Step 4

Azure policy

Step 2

Create an initiative definitions

Ortega, Ivan

A set of policy definitions that help you **track your resource compliance state to meet a larger goal.** Ensure resources are compliant with security regulations.

Examples of

Ortega, Ivan

Configure Windows machines to run Azure Monitor Agent and associate them to a Data Collection Rule:

Ortega, Ivan

Configure Azure Defender to be enabled on SQL servers

Step 3

Scope the initiative definition

Ortega, Ivan

Control how your initiative definitions are applied to resources in your organization. You can **limit the scope of an initiative definition to specific management groups, subscriptions, or resource groups.**
